

*Instructions for QCTool License Renewal
For versions of QCTool older than version 2.0*

1. We require you to send your current QCTool serial number to QCTool support using the link below. We will also accept your CD container.
2. When we have received your old QCTool serial number, you will have a new serial number emailed to you.
3. Download the RenewLicense utility available at <http://www.qc-tool.com/download/RenewLicense.exe>
4. Run the RenewLicense utility and enter the new serial number you received from us.
5. Your default web browser will open a page where you may pay for a one year license renewal.
6. Click the “Buy Now” button and enter the information requested to pay for the renewal.
7. You will receive an email confirming the purchase of your license renewal.
8. QCTool’s update utility was introduced with version 2.2. You need to install and register the latest version of QCTool to use this feature. Version 2.3 is available at <http://www.qc-tool.com/downloads.php>.
9. During the installation procedure, you will be asked to enter your new serial number. Once the installation is complete, your license will be registered and you will then have access to QCTool updates for a year from the date of registration.
10. Select “Update” from the QCTool group on the Start menu to confirm that you have access to QCTool updates.
11. A message saying there is an update available indicates the license renewal was successful. A message saying that no update was found also indicates success and that your QCTool files are up to date.
12. A message saying that your update period has expired indicates that the license renewal process was unsuccessful and you should contact us using the link below for assistance.
